## **DETAILED ACTION**

### ***Claim Objections***

Claims 4-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 4. See MPEP § 608.01(n). Accordingly, the claims 4-8 has not been further treated on the merits.

Claims 9-11 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 9. See MPEP § 608.01(n). Accordingly, the claims 9-11 not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 2002/283512. The Japanese patent application discloses an apparatus comprising a water storage area (6) for evaporating water, a fan (3), a photo catalyst (5) in contact with the said water and being inherently capable of providing ultraviolet radiation for irradiating a photo catalyst.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3744

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 & 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2002/283512 in view of Varaprasad (US Patent No. 2002/0041443). The Japanese patent discloses the claimed invention as stated above but lack to mention a titanium dioxide. Varaprasad teaches an inorganic material and catalyst made from titanium dioxide. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the disclosed invention with the teaching of Varaprasad for improving the irradiation of the catalyst.
